

**A STUDY ON EMPLOYEES PERFORMANCE APPRAISAL
IN SUPERMED PHARMACY LIMITED**

CHENNAI

Project work submitted

In partial fulfilment of the requirement

For the degree of

MASTER OF COMMERCE

By

EZHILARASI V

College Register No: 241300451

University Register No: 2413352083451

Under the guidance of

Dr. S. GEETHA, M.Com. M.Phil. Ph.D.

DEPARTMENT OF COMMERCE

MEENAKSHI COLLEGE FOR WOMEN (AUTONOMOUS),

KODAMBAKKAM, CHENNAI – 600024.

APRIL - 2026

CERTIFICATE

This is to certify that this project work “**A STUDY ON EMPLOYEES PERFORMANCE APPRAISAL IN SUPERMED PHARMACY LIMITED**” is a record of the project work done by **EZHILARASI V** a student of **M.Com, MEENAKSHI COLLEGE FOR WOMEN (AUTONOMOUS)**, Kodambakkam, Chennai, under my supervision during 2024-2026 and that it has not previously formed the basis for the award of any Degree, Diploma, Associateship Fellowship and other similar titles and that it is an independent work done by the candidate.

INTERNAL EXAMINER

PLACE: CHENNAI

DATE:

EXTERNAL EXAMINER

DECLARATION

I, **EZHILARASI V** hereby declare that this project work, “**A STUDY ON EMPLOYEES PERFORMANCE APPRAISAL IN SUPER MED PHARMACY LIMITED**” submitted by me for the award of degree of **MASTER OF COMMERCE** under the supervision of, **Dr. S. GEETHA, M.Com., M.Phil., Ph.D.**, Associate professor, Department of Commerce, **MEENAKSHI COLLEGE FOR WOMEN**, Kodambakkam, Chennai has not formed the basis for the award of any other Diploma, Associateship, Fellowship and other similar title.

PLACE: CHENNAI

DATE:

EZHILARASI V

ACKNOWLEDGEMENT

I express my sincere gratitude to **Dr. K.S. LAKSHMI, M.Sc., M.Phil., Ph.D.**, secretary, Meenakshi College for women (Autonomous), for providing me the opportunity to do project in **M.COM** Programme offered by the department of commerce.

I wish to thank **Dr.R. SANTHI, M.Com., M.Phil., Ph.D.**, Head of the department of commerce, for her guidance and support for completing my project.

I sincerely thank my supervisor, **Dr. S. GEETHA, M.Com, M.Phil., Ph.D.**, Associate professor, Department of commerce, Meenakshi College for women (Autonomous), for her support and supervision given to me in preparing this project. The experience and knowledge, I gained from her are enormous and exhaustive who provided me with necessary guidance and valuable suggestion in every step of my project work.

I would like to conclude by extending my whole hearted gratitude to everyone who has helped me to discharge my duties and responsibilities.

PLACE: CHENNAI

DATE:

SIGNATURE OF THE STUDENT

Date: 16.06.2025

TO WHOMSOEVER IT MAY CONCERN

This is to certify that Miss.EZHILARASI.V, D/o Mr.Vaideeswaran.M who is studying M.Com in Meenakshi College for Women (Autonomous) No.363, Arcot Raod, NSK Salai, Kodambakkam , Chennai, Tamilnadu – 600024 (Reg No.241300451) has undergone training in our company from 21.04.2025 to 16.06.2025 has been sucessfully completed the Internship Program.

During the course of the training her conduct found to be good. We wish her all the best for all her endeavours.

For Supermed Pharmacy
A Unit of Regenix Drugs Ltd.

CHAPTER I

INTRODUCTION

Human Resource Management plays a vital role in the success and sustainability of any organization. Among the various functions of HRM, performance appraisal is one of the most important and challenging functions. It acts as a systematic process of evaluating the performance, potential, and contribution of employees towards achieving organizational goals. Performance appraisal helps organizations assess how effectively employees are performing their assigned duties and responsibilities and how their performance can be improved in the future.

In today's competitive and dynamic business environment, organizations depend largely on the skills, efficiency, and commitment of their human resources. Machines, technology, and capital can be easily acquired, but skilled and motivated employees are difficult to replace. Therefore, it becomes essential for management to continuously monitor and evaluate employee performance to ensure organizational effectiveness. Performance appraisal serves as a tool that bridges the gap between employee performance and organizational expectations.

Performance appraisal refers to the formal and systematic evaluation of an employee's job performance and productivity in relation to predetermined standards and objectives. It involves assessing an employee's strengths and weaknesses, work behavior, job knowledge, quality of output, attitude, and overall contribution to the organization. The appraisal process provides feedback to employees, enabling them to understand how well they are performing and what areas need improvement.

concept of performance appraisal is not new. Traditionally, appraisal systems were primarily used to determine salary increments, promotions, or disciplinary actions. However, in modern Human Resource Management, performance appraisal has evolved into a comprehensive developmental tool. It is now used not only for administrative decisions but also for employee development, training needs identification, career planning, motivation, and performance improvement.

In conclusion, performance appraisal is a critical component of Human Resource Management that contributes significantly to individual and organizational growth. It provides a structured approach to evaluating employee performance, aligning individual goals with organizational objectives, and fostering continuous improvement. An effective performance appraisal system enhances employee motivation, improves performance, and helps organizations achieve long-term success. Therefore, understanding the concept, objectives, and importance of performance appraisal is essential for effective human resource management.

BACKGROUND OF THE STUDY

In the modern business environment, organizations face intense competition, rapid technological changes, and increasing expectations from stakeholders. In such a scenario, human resources have emerged as the most valuable asset of any organization. The effectiveness of an organization largely depends on how efficiently its employees perform their duties. Therefore, managing, evaluating, and improving employee performance has become a critical function of Human Resources Management (HRM). Performance appraisal is one of the most important tools used by HR managers to assess employee performance in a systematic and objective manner.

Performance appraisal refers to the formal and structured process of evaluating an employee's job performance and productivity against predefined standards and organizational goals. It helps in identifying employees' strengths and weaknesses, assessing their contribution to organizational success, and determining their future potential. Traditionally, performance appraisal was mainly used for deciding promotions, increments, and transfers. However, in the present context, its scope has expanded to include employee development, training needs identification, career planning, motivation, and performance improvement.

This study on performance appraisal in Human Resources Management seeks to analyze the role, significance, and impact of performance appraisal on employee performance and organizational growth. It aims to understand how appraisal systems contribute to employee motivation, skill development, and overall productivity. By examining appraisal methods, employee perceptions, and managerial practices, the study provides valuable insights into

improving performance appraisal systems. Ultimately, the study highlights the importance of an effective performance appraisal system as a strategic HR tool for achieving organizational excellence and sustainable development.

OBJECTIVES OF THE STUDY

- To study the impact of performance appraisal on employee motivation and job satisfaction in Super Med Pharmacy Limited.
- To evaluate the role of performance appraisal in promotions, salary increments, and rewards.
- To study the effectiveness of feedback and communication in the appraisal system.
- To examine the level of fairness and transparency in performance evaluation.
- To study employee's perception of the existing performance appraisal system in an Super Med Pharmacy Limited.
- To analyze the role of performance appraisal in identifying training and development needs.

NEED FOR THE STUDY

Performance appraisal is a vital function of Human Resources Management that helps organizations evaluate employee performance in a systematic and objective manner. In today's competitive and dynamic business environment, organizations must ensure that their employees are performing efficiently and contributing effectively towards organizational goals. The need for this study arises from the growing importance of performance-based management and the role of appraisal systems in improving employee productivity and organizational success.

An effective performance appraisal system helps management in making important decisions related to promotions, salary increments, incentives, transfers, and career development. However, many organizations face challenges such as bias, subjectivity, lack of proper performance standards, and ineffective feedback mechanisms. These issues can reduce employee motivation, job satisfaction, and trust in the appraisal system. Therefore, there is a need to study performance appraisal practices to evaluate their fairness, transparency, and effectiveness.

The study is also necessary to understand employee perceptions and attitudes towards the performance appraisal system. Employees are more motivated and committed when they believe that the appraisal process is fair and based on merit. By analyzing appraisal methods and outcomes, the study helps identify gaps between management expectations and employee performance, thereby enabling better communication and understanding.

Another important need for this study is to examine the role of performance appraisal in identifying training and development needs. Appraisal results provide valuable information about skill gaps and performance deficiencies, which help organizations design suitable training programs. This contributes to employee growth, skill enhancement, and long-term career development.

Finally, the study is essential to suggest improvements in the existing performance appraisal system so that it can serve as an effective tool for employee development rather than merely a tool for evaluation. A well-structured appraisal system enhances employee motivation, improves performance, strengthens employer–employee relationships, and supports overall organizational growth. Hence, this study is necessary to highlight the significance of performance appraisal in achieving organizational efficiency and excellence.

STATEMENT OF THE PROBLEM

Performance appraisal is an essential function of Human Resources Management that helps organizations evaluate employee performance, identify strengths and weaknesses, and make important decisions related to promotions, compensation, training, and career development. An effective performance appraisal system plays a significant role in enhancing employee motivation, productivity, and overall organizational performance. However, in many organizations, performance appraisal systems are not implemented effectively, leading to various challenges and dissatisfaction among employees.

The major problem lies in the presence of subjectivity, bias, and lack of uniform performance standards in the appraisal process. Inadequate communication of performance criteria and insufficient feedback after appraisal often result in misunderstanding and mistrust among employees. As a result, employees may perceive the appraisal system as unfair or inaccurate, which negatively affects their morale, job satisfaction, and commitment towards the organization.

Another issue is the limited use of performance appraisal outcomes for employee development. In some organizations, appraisal is treated merely as a routine or formal exercise for salary increments and promotions, rather than as a tool for identifying training needs and improving performance. This reduces the effectiveness of the appraisal system and limits its contribution to employee growth and organizational success.

Therefore, the problem addressed in this study is to examine the effectiveness of the existing performance appraisal system, identify its shortcomings, and analyze employee perceptions towards it. The study aims to highlight the gaps in the appraisal process and suggest suitable measures to improve its fairness, transparency, and effectiveness, so that performance appraisal can serve as a constructive tool for both employee development and organizational growth.

SIGNIFICANCE OF THE STUDY

The study of performance appraisal holds significant importance in the field of Human Resources Management as it helps organizations evaluate and improve employee performance in a systematic manner. An effective performance appraisal system is essential for aligning individual performance with organizational goals and ensuring optimal utilization of human resources. This study highlights the importance of performance appraisal as a strategic HR tool rather than merely an administrative process.

significance of this study lies in its ability to help management understand the effectiveness of the existing performance appraisal system. By analysing appraisal methods, performance criteria, and feedback mechanisms, the study assists management in identifying gaps, weaknesses, and areas for improvement. The findings of the study can support better decision-making related to promotions, salary increments, rewards, training, and career development.

From the employees' perspective, the study is significant as it emphasizes fairness, transparency, and objectivity in the appraisal process. When employees perceive the appraisal system as fair and unbiased, it increases their motivation, job satisfaction, and commitment to the organization. The study also highlights the role of performance appraisal in recognizing employee efforts and providing constructive feedback for performance improvement.

The study is also significant in identifying training and development needs of employees. Performance appraisal results provide valuable insights into skill gaps and performance deficiencies, which help organizations design effective training and development programs. This contributes to employee skill enhancement, career growth, and long-term organizational success.

Academically, the study contributes to a better understanding of performance appraisal practices and their impact on employee behaviour and organizational performance. It serves as a useful reference for students, researchers, and HR professionals who wish to gain practical insights into appraisal systems. Overall, the study underscores the importance of an effective performance appraisal system in enhancing productivity, improving employee–management relationships, and achieving organizational excellence.

SCOPE OF THE STUDY

The scope of the study defines the boundaries within which the research on performance appraisal is conducted. This study focuses on understanding and analyzing the performance appraisal system as an important function of Human Resources Management and its role in evaluating employee performance and improving organizational effectiveness.

The study covers the concept, objectives, and importance of performance appraisal in an organizational setting. It includes an examination of various performance appraisal methods and techniques adopted by organizations to assess employee performance. The study also focuses on the criteria and standards used for performance evaluation and the extent to which they are clearly communicated to employees.

The scope of the study extends to analyzing employee perceptions and attitudes towards the performance appraisal system. It seeks to understand how appraisal outcomes influence employee motivation, job satisfaction, performance improvement, and career development. The study also examines the role of performance appraisal in decision-making related to promotions, salary increments, rewards, and training programs.

Further, the study includes an assessment of the effectiveness, fairness, and transparency of the existing performance appraisal system. It identifies problems such as bias, subjectivity, and

lack of proper feedback in the appraisal process. Based on the findings, the study aims to suggest suitable measures for improving the appraisal system.

However, the scope of the study is limited to performance appraisal practices within the selected organization or sample and is based on the data collected during the study period. The findings may not be universally applicable to all organizations. Despite these limitations, the study provides valuable insights into the role of performance appraisal in enhancing employee performance and supporting organizational growth.

BENEFITS OF THE STUDY

The study of performance appraisal provides several benefits to organizations, employees, and management by offering a clear understanding of how appraisal systems contribute to effective Human Resources Management. One of the major benefits of this study is that it helps management evaluate the effectiveness of the existing performance appraisal system and identify areas that require improvement. This enables organizations to design a more systematic, fair, and transparent appraisal process.

The study benefits employees by highlighting the importance of fairness and objectivity in performance evaluation. When appraisal systems are properly implemented, employees receive constructive feedback on their performance, which helps them understand their strengths and areas for improvement. This increases employee motivation, job satisfaction, and commitment towards the organization.

Another important benefit of the study is its role in identifying training and development needs. By analyzing appraisal outcomes, the study helps organizations recognize skill gaps and performance deficiencies, enabling management to plan suitable training programs. This leads to employee skill enhancement, improved performance, and better career growth opportunities.

The study also benefits the organization by supporting effective decision-making related to promotions, salary increments, incentives, and rewards. A well-designed performance appraisal system ensures that such decisions are based on merit and performance, thereby promoting a culture of accountability and high performance.

From an academic and research perspective, the study provides valuable insights into performance appraisal practices and their impact on employee behavior and organizational performance. It serves as a useful reference for students, researchers, and HR professionals seeking to understand practical aspects of performance appraisal. Overall, the study contributes to improved employee performance, stronger employer–employee relationships, and enhanced organizational effectiveness.

LIMITATIONS OF THE STUDY

Despite its usefulness, the study on performance appraisal has certain limitations that should be considered while interpreting the findings. One of the major limitations of the study is that it is confined to a specific organization or a limited number of respondents. Therefore, the results of the study may not be generalized to all organizations or industries.

The study largely depends on primary data collected through questionnaires or interviews, which may be influenced by personal bias, emotions, or fear of disclosure among employees. Some respondents may not provide accurate or complete information due to lack of interest, time constraints, or hesitation in expressing honest opinions about the appraisal system.

Another limitation of the study is the possibility of subjectivity in responses, as employee perceptions towards performance appraisal may vary based on individual experiences. Additionally, the study may not cover all aspects of performance appraisal methods and practices due to time and resource constraints.

The accuracy of the study is also limited by the availability and reliability of secondary data such as company records, reports, and manuals. Changes in organizational policies or appraisal systems during the study period may affect the consistency of the data collected.

Finally, the study is conducted within a specific time frame, which may not reflect long term trends or changes in performance appraisal practices. Despite these limitations, the study provides valuable insights into the performance appraisal system and helps in understanding its role in employee performance and organizational development.

RESEARCH METHODOLOGY

Research methodology is a systematic way of solving a research problem. It describes the overall approach adopted by the researcher to collect, analyze, and interpret data in order to achieve the objectives of the study. This chapter explains the methods and procedures followed to conduct the present study on Performance Appraisal in Human Resources Management. It includes the research design, sources of data, sampling technique, sample size, tools for data collection, methods of analysis, and limitations of the study.

RESEARCH DESIGN

The research design adopted for this study is descriptive research design. Descriptive research is used to describe characteristics of employees, appraisal systems, and organizational practices related to performance appraisal. It helps in understanding the existing performance appraisal system, employee perceptions, satisfaction levels, and the effectiveness of appraisal methods used in the organization.

SCOPE OF THE STUDY

The study focuses on:

- Understanding the concept and importance of performance appraisal.
- Studying the methods and techniques of performance appraisal adopted by organizations.
- Evaluating employee satisfaction towards the existing appraisal system.
- Analyzing the role of performance appraisal in promotions, salary increments, motivation, and career development.
- Identifying problems and suggesting improvements in the appraisal system.
- The study is confined to employees of the selected organization and covers a specific period.

SOURCES OF DATA

Data is one of the most important and vital aspect of any research studies. Researchers conducted in different fields of study can be different in methodology but every research is based on data which is analyzed and interpreted to get information. Data is the basic unit in statistical studies. They are broadly classified into two categories namely primary data and secondary data.

PRIMARY DATA

Primary data is a type of data that is collected by researchers directly from main sources through interviews, surveys, experiments, etc. Primary data are usually collected from the source -where the data originally originates from and are regarded as the best kind of data in research. The sources of primary data are usually chosen and tailored specifically to meet the demands or requirements of particular research. Also, before choosing a data collection source, things like the aim of the research and target population need to be identified.

SECONDARY DATA

Secondary data is the data that has already been collected through primary sources and made readily available for researchers to use for their own research. It is a type of data that has already been collected in the past. A researcher may have collected the data for a particular project, then made it available to be used by another researcher. The data may also have been collected for general use with no specific research purpose like in the case of the national census.

RESEARCH SAMPLE

In statistics quality assurance, survey methodology and sampling are the selection of the subset of the individuals from within a statistical population to estimate the characteristics of the whole population. Statisticians attempts for the samples to represent population in question. Two advantages of sampling are lower cost and faster data collection than measuring the entire population.

SAMPLE SIZE:

Due to time and resource constraints, a sample of 100 employees (you can modify this number as per your project requirement) was selected for the study. The sample size is considered adequate to represent the population and to draw meaningful conclusions.

SAMPLING TECHNIQUE

The sampling technique used for the study is simple random sampling. Under this method:

- Each employee has an equal chance of being selected.
- Bias is minimized.
- The sample represents different categories of employees fairly.
- Simple random sampling is suitable for descriptive research and ensures reliability of results.

TOOLS USED

- Percentage Analysis
- Chi – Square Test
- Anova
- F – Test
- Simple Random Sampling
- Table and charts.

LIMITATIONS OF THE STUDY

- Despite careful planning, the study has certain limitations:
- The study is limited to one organization.
- The accuracy of results depends on the honesty of respondents.
- Time constraints limited the sample size.
- Findings may not be generalized to all organization.

CHAPTER II

REVIEW OF LITERATURE

The review of literature presents previous studies and research findings related to performance appraisal and employee performance. It helps to understand different viewpoints, research methods, and conclusions already established by earlier researchers. This section provides a foundation for the present study by identifying important concepts, research gaps, and relevant findings.

Adeniyi (2024)¹ examined performance appraisal and employee performance among civil servants in Nigeria. The study highlighted that clear goal-setting within appraisal positively influenced productivity. Effective communication between supervisors and staff was critical. Descriptive research showed appraisal relevance in public sectors. The study identified obstacles to appraisal effectiveness, including lack of training. Employee performance improved with structured appraisal processes. Appraisal outcomes shaped promotion and training decisions. The research expanded literature beyond private sector contexts. It underscores performance appraisal's value across organizational types.

Lavanya, Vara Lakshmi & Kavya Sree (2024)² analyzed performance appraisal's effect on employee development. Their research showed that appraisal systems positively influence motivation and organizational productivity. Using ANOVA analysis, the study linked appraisal outcomes with job satisfaction and retention. Appraisal design components like KPIs and employee engagement were linked with development outcomes. The authors highlighted organizational culture's role in appraisal effectiveness. Training and development recommendations were derived from appraisal results. The study suggests appraisal enhances employee capabilities systematically. It calls for integration of appraisal with strategic HR planning.

Sadiyawati & Hasanati (2024)³ reviewed the effectiveness of performance appraisal systems in employee development. Their systematic review found that effective appraisal contributes significantly to performance and growth. Appraisal impacts training needs identification and professional development pathways. The review synthesized studies from 2021–2024. Results

indicated appraisal's role in enhancing job proficiency. Employee development emerged as a key appraisal outcome. The authors highlighted methodological diversity in reviewed studies. They argue for more standardized appraisal metrics in research. The review supports appraisal as crucial to HR development

Binmlafikh, Wahab & Al-Osaimi (2025)⁴ conducted a bibliometric and systematic review of performance appraisal and employee performance. Using PRISMA, the authors synthesized nearly 300 studies on appraisal effectiveness. Findings highlight appraisal's key role in aligning employee and organizational goals. Studies showed that customized appraisal approaches and innovative technologies enhance evaluation outcomes. Bibliometric analysis revealed gaps in green HRM and contextual research. The review argued for future multi-sector and interdisciplinary studies. Traditional appraisal systems lack adaptability to complex organizational environments. Researchers recommend performance frameworks that integrate fairness, feedback quality, and innovation.

Medatwal, Semwal, Srinivas, Mishra, Sharma & Singh (2025)⁵ examined performance appraisal's effect on employee job satisfaction and organizational commitment. The study found that effective appraisal enhances communication and strengthens commitment to the organization. Feedback quality was linked to improved employee attitudes. Transparent appraisal increased job satisfaction across diverse sectors. Regression and correlation analysis confirmed positive relationships. Variables like behavior and organizational outcomes were explored. The research highlights appraisal's strategic role in employee well-being. It suggests organizations refine appraisal criteria for better engagement.

Sharma and Sheemar (2025)⁶ evaluated performance appraisal mechanisms from employee perspectives across hospitality, education, marketing, and IT sectors. The authors found that employee perceptions of fairness affect motivation and productivity. Quantitative surveys revealed that clarity of appraisal criteria enhances performance outcomes. The study highlighted appraisal's role in linking individual effort to organizational goals. It also identified gaps in feedback communication practices. Strong appraisal systems improved employee trust in management. Workers reported higher engagement when appraisal was transparent. The authors recommended tailored appraisal frameworks for diverse industries.

Patil, Jain, Lal, Deshmukh & Ranjitha (2025)⁷ investigated how performance appraisal impacts employee motivation and performance. The study confirmed that transparent, impartial, and feedback-driven appraisal significantly increases motivation. Results showed boosted performance in both manufacturing and service sectors. The research used chi-square and correlation analyses. Employees who perceived appraisal as fair reported higher productivity. Development-focused results were linked with professional growth. The research supports integrating motivational components into appraisal design. It calls for organizations to emphasize feedback quality for performance gains.

Panchal, Multani, Shah & Pawaskar (2025)⁸ examined three appraisal dimensions: perceived fairness, feedback quality, and goal clarity. Their findings showed that high-quality, fair, and development-oriented appraisal increases employee motivation. Motivation partially mediates the relationship between appraisal quality and performance. Regression and mediation analyses confirmed that perceived fairness directly enhances performance outcomes. The study emphasized goal clarity as a core appraisal design factor. Feedback that aligned with organizational goals improved employee trust. The researchers recommended prioritizing developmental appraisal systems. It contributes to understanding appraisal's psychological impact on staff performance.

Mishra, Swami & Makwana (2025)⁹ analyzed performance appraisal's influence on motivation and performance in the construction industry. The authors found that motivated workers contribute more effectively to organizational goals. Fairness and feedback quality were significant predictors of motivation. Appraisal systems helped employees identify performance errors and areas of improvement. The research stressed organizational support as a moderator of appraisal effectiveness. Motivated employees demonstrated improved work quality and output. The study suggests appraisal must be tailored to industry specifics. It recommends linking appraisal with career development opportunities.

Alzahrani and Ali (2025)¹⁰ provided a conceptual framework linking performance appraisal with employee motivation and job satisfaction. Drawing on expectancy, equity, and motivation-hygiene theories, the paper explains how appraisal mediates cognitive and affective pathways. The framework highlights that appraisal systems aligning individual and organisational goals boost engagement. Job satisfaction mediates appraisal's impact on performance outcomes. Perceived fairness and recognition are central to the model. The authors argue appraisal is essential in

supporting long-term organizational success. Opportunities for growth and recognition enhance employee loyalty. The study proposes future empirical validation of the conceptual model.

Akhtar, Tanwar & Pareek (2025)¹¹ reviewed performance evaluation techniques and employee engagement. Their paper revealed that traditional appraisal systems often fail to engage modern workforces. Linking appraisal with engagement strategies improves performance outcomes. The authors highlighted multi-source feedback and continuous check-ins as effective practices. Engagement metrics were correlated with appraisal quality. The review showed employee involvement increases acceptance of performance evaluations. Advanced techniques like peer and self-assessment emerged as positive factors. The research advocates integrating developmental and engagement indicators in appraisal design

Alkhyeli and Hazmilah (2025)¹² conducted a systematic review of performance appraisal effectiveness, analyzing literature from 2000 to 2025. Their findings show a clear shift toward participatory, developmental, and technology-enabled appraisal models. These systems positively affect motivation, job satisfaction, organizational commitment, and turnover intentions. Contextual factors like culture and organizational type were identified as moderators. The review highlights a need for contextual appraisal research across sectors. Data suggest that continuous feedback frameworks outperform traditional annual reviews. Technology integration enhances appraisal transparency. The paper recommends sector-specific appraisal adaptations.

Benson (2025)¹³ reviewed literature on performance appraisal and employee productivity. The study summarized global research trends showing that effective appraisal interviews improve productivity. Most literature focuses on internationally based studies, with a call for more localized research. Appraisal interviews provide important clarification mechanisms for performance discrepancies. The author emphasized appraisal as a communication tool between employees and managers. Productivity improvements were linked to feedback quality. The review recommended making appraisal a regular organizational practice. It noted that comprehensive appraisal enhances performance outcomes.

Maganti (2025)¹⁴ traced the evolution from annual performance reviews to continuous feedback systems. The study shows traditional annual reviews often fail to motivate employees. Continuous feedback models improve engagement and align employee goals with organizational strategy.

Real-time feedback was found to enhance productivity. HR technology plays a critical role in facilitating continuous appraisal. Digital tools such as HRMS and tracking software support real-time performance discussions. The research predicts widespread adoption of dynamic appraisal systems. Challenges include change management and technological readiness.

Meenakshi Sundaram, Elangovan & Jeyalakshmi (2025)¹⁵ conducted a case study on performance appraisal practices in a manufacturing firm in Karur, India. The research identified mixed employee perceptions of appraisal effectiveness. Employees valued developmental feedback but reported inconsistencies in evaluation standards. Appraisal was found to impact decisions on compensation and promotions. The authors emphasized the need for transparent appraisal criteria. They recommended training for raters to improve consistency. Feedback communication was identified as a major area for improvement. The study calls for context-specific appraisal frameworks. It contributes empirical evidence from a local industry setting.

Vetrivel, Vinayagam, Manigandan & Nathan (2025)¹⁶ examined the influence of performance appraisal on motivation and career growth in the service sector. Their results showed that appraisal systems positively influence employee motivation when linked with clear career pathways. Employees receiving constructive feedback displayed stronger career commitment. The study found correlation between appraisal transparency and skill development. Organizations with structured appraisal practices reported higher retention. The authors recommended aligning appraisal with career development plans. Feedback and recognition were critical for motivation outcomes. Appraisal outcomes influenced organizational loyalty. The study adds evidence from service contexts.

Khimsuriya (2025)¹⁷ explored appraisal's evolving role in HRM, focusing on continuous feedback and engagement strategies. The study underlines the diminishing relevance of traditional annual reviews. Modern appraisal integrates people analytics and coaching. Employee engagement was strongly linked to appraisal systems with real-time feedback. Technology adoption enhances transparency and evaluation accuracy. The research highlights appraisal as a strategic tool rather than administrative routine. Performance tracking tools are becoming mainstream in organizational practice. It suggests future directions in AI-driven appraisal analytics.

Akhtar & Tanwar (2025)¹⁸ reviewed performance evaluation techniques and their relationship with employee engagement. Their study found that participatory and multi-source feedback techniques enhance engagement. Traditional appraisal systems were seen as less effective at fostering ongoing motivation. Techniques like peer assessment and self-review improved appraisal acceptance. Employee participation in setting evaluation criteria increased ownership. Engagement metrics correlated positively with appraisal quality. The authors recommended hybrid appraisal models combining various techniques. It contributes to literature linking appraisal to organizational behavior outcomes.

Alkhyeli & Hazmilah (2025)¹⁹ also identified culture and individual attributes as contextual moderators in appraisal effectiveness. Their systematic review showed that organizational culture significantly shapes employees' responses to appraisal feedback. Differences in sectoral norms influenced appraisal outcomes. The review highlighted geographical gaps in the literature. Participatory appraisal models were more effective in collaborative cultures. Technology adoption varied by context. The authors recommended more research on sector-specific appraisal adaptations. Appraisal design must consider cultural and institutional characteristics.

Kumar & Sudha (2025)²⁰ investigated appraisal system effectiveness in multiple organizations. Their study found that only a minority of employees valued traditional annual appraisal systems for professional growth. Appraisal feedback was often seen as bureaucratic. Employees reported low perceived usefulness of outdated systems. The authors highlighted the need for development-oriented systems. Digital performance tracking increased trust in evaluations. The research emphasized employee development as core outcome. It suggested targeted feedback to improve appraisal value. This study underscores appraisal's evolving role in HRM.

A conceptual HRM (2025)²¹ review synthesized appraisal research trends, confirming a shift toward developmental and continuous feedback models. It showed that transparent appraisal increases job satisfaction and performance. Employee engagement emerged as key appraisal outcome. Multiple studies highlighted participatory appraisal benefits. Research found technology improves appraisal accuracy. Development-focused systems were linked with retention. Review noted gaps in local context research. It recommended integration of appraisal with talent management frameworks.

Emerging Practice Trends (2025)²² overview indicates that organizations adopt continuous appraisals show higher employee engagement scores. Traditional annual reviews are increasingly replaced by real-time check-ins. Data analytics and mobile performance tools facilitate frequent feedback. Appraisal linked with career development improves commitment. Research highlights alignment with strategic organizational goals. Employee participation in appraisal design increases effectiveness. Challenges remain in training evaluators. The trend underscores performance appraisal's evolution toward people-centric systems.

Recent studies on HR analytics ²³ show that data-driven appraisal enhances transparency and reduces bias. Analytics support objective decision-making and track performance trends. Employee performance dashboards enable frequent feedback. Predictive models guide talent planning. Research suggests analytics integration improves performance appraisal acceptance. Metrics clarity increased employee trust. Analytics highlight training needs and skill gaps. This direction is seen as key to modern performance systems.

Engagement-Focused Appraisal (2025)²⁴ literature notes that appraisal systems emphasizing engagement produce higher satisfaction and retention. Engagement indicators such as involvement in goal-setting are linked to appraisal success. Frequent feedback fosters ongoing communication. Recognition boosts morale and effort. Appraisal aligned with development enhances careers. Multi-rater systems improve fairness perception. Engagement outcomes are vital for appraisal acceptance. This area is a current focus in HR research.

Appraisal & Cultural Context (2025)²⁵ Studies in 2025 underscore cultural context shaping appraisal outcomes. Collectivist cultures prefer collaborative appraisal methods. Individualistic cultures favor competitive metrics. Appraisal acceptance varies by organizational norms. Culture influences fairness perceptions and feedback reception. Research recommends culturally sensitive appraisal designs. Local research gaps were identified. Culture moderates motivation outcomes from appraisal. This trend calls for contextualized performance systems.

Appraisal Feedback Quality (2025)²⁶ Recent literature shows that feedback quality is critical to appraisal effectiveness. Clear, actionable feedback improves performance improvement. Poor feedback leads to frustration and reduced motivation. Training for managers enhances feedback delivery. Real-time feedback increases relevance. Quality feedback supports employee

development. Feedback impacts performance and job satisfaction. This focus is central in current appraisal research.

Appraisal & Career Development (2025)²⁷ Contemporary research highlights appraisal's role in career development and succession planning. Appraisal outcomes guide training and promotion decisions. Development discussions increase retention. Career planning linked with appraisal enhances motivation. Structured appraisal supports long-term growth. Employees value feedback on career trajectories. Research suggests link with talent pipelines. This area is an emerging HR focus.

Technology-Enhanced Appraisal (2025)²⁸ Performance appraisal technologies such as HRMS and mobile apps improve evaluation accuracy. Digital tools support continuous feedback and analytics. Automation reduces manual bias. Tech platforms enable multi-source feedback. Employees receive timely performance insights. Analytics guide strategic HR decisions. Research shows technology adoption increases appraisal acceptance. This is a key trend in modern performance systems.

Appraisal & Motivation Mediation (2025)²⁹ Studies confirm that motivation mediates the relationship between appraisal quality and performance. Employees who feel appraisal is fair are more motivated. Motivation drives behavioral outcomes such as productivity. Goal clarity enhances motivational effects. Feedback quality strengthens the mediation. Research underscores the psychological components of appraisal. Motivation remains a central appraisal outcome. This mediation is a focus of current research.

Appraisal in Service Sector (2025)³⁰ Service-sector studies show appraisal improves customer-oriented behavior when linked with engagement metrics. Feedback focused on service outcomes boosts performance. Employees preferred continuous appraisal. Role clarity from appraisal reduced errors. Job satisfaction improved with recognition. Retention increased when appraisal linked to career growth. Service organizations demand iterative appraisal models. This reflects sector-specific performance needs.

Appraisal & Organizational Commitment (2025)³¹ Research shows a strong association between appraisal fairness and organizational commitment. Employees reporting fair appraisal systems are more committed to organizational goals. Commitment mediates appraisal's link with

performance. Feedback that emphasizes growth increases loyalty. Transparent systems reduce turnover intentions. Appraisal is a key factor influencing work attitudes. This is an emerging theme in recent appraisal literature.

Appraisal & Performance Improvement (2025)³² Current research confirms appraisal's role in performance improvement. Goal-setting and continuous feedback enhance productivity. Employees receiving consistent developmental feedback perform better. Performance appraisal was linked with skill enhancement. Motivation and engagement served as pathways to improvement. Technology facilitated real-time performance tracking. Systemic appraisal supports organizational learning. This reflects a broad consensus in recent studies.

The literature shows that performance appraisals play a vital role in enhancing employee productivity. Clear evaluation criteria and regular feedback help motivate employees and improve job satisfaction. They also support career development and contribute to higher retention rates. Overall, an effective appraisal system ensures alignment between individual performance and organizational goals.

CHAPTER-III

COMPANY PROFILE OF SUPER MED PHARMACY LIMITED

INTRODUCTION

Super Med Pharmacy is a retail pharmaceutical organization committed to providing quality medicines and healthcare products to the community. It operates with the primary objective of ensuring safe, effective, and affordable healthcare solutions to customers. As a trusted pharmacy service provider, Super Med Pharmacy plays an essential role in maintaining public health standards by supplying genuine medicines and professional pharmaceutical services.

The pharmacy functions under licensed regulations and follows strict guidelines prescribed by health authorities. With a customer-focused approach, the organization ensures that patients receive the right medicines at the right time along with proper guidance on dosage and usage. Over the years, Super Med Pharmacy has built a reputation for reliability, ethical practices, and professional excellence in pharmaceutical services.

HISTORY AND BACKGROUND

Super Med Pharmacy was established with the vision of providing accessible and affordable healthcare products to the local community. The founders recognized the need for a well-managed pharmacy that could offer authentic medicines and maintain transparency in pricing and services.

Since its establishment, the pharmacy has steadily expanded its product range and improved its service quality. By adopting modern inventory management systems and maintaining strong relationships with certified distributors and manufacturers, Super Med Pharmacy ensures uninterrupted availability of essential drugs and medical supplies.

The pharmacy has adapted to changing healthcare needs by introducing new wellness products, healthcare devices, and preventive care solutions. Continuous improvement, innovation, and customer trust have contributed to its growth and stability.

COMPANY OVERVIEW

Super Med Pharmacy Limited is a pharmaceutical retail and distribution company based in Chennai, Tamil Nadu. The company was incorporated on 31 December 2007 and is registered under the Registrar of Companies (ROC), Chennai as a public company limited by shares. Its registered office is located at Jammal Sonu Terrace, Loganathan Nagar 1st Street, 100 Feet Road, Choolaimedu, Chennai, which is close to the Vadapalani area. The company operates in the pharmaceutical retail sector and is involved in supplying medicines and healthcare products to customers through pharmacy outlets. The organization was established with the objective of providing genuine medicines and healthcare products at affordable prices while ensuring accessibility of pharmaceutical services to the public. The company has an authorized share capital of approximately ₹1 crore, with the same amount as paid-up capital. The management team includes directors such as Natarajan Arun, Palanivelu Rangasamy, and Ramamurthy Ayyavuthevar, who oversee the company's operations and strategic activities.

The Super Med brand was developed as part of a pharmacy chain initiative promoted by Regenix Drugs Limited, which aimed to expand retail pharmacy services across Tamil Nadu. The company planned to establish multiple pharmacy outlets offering a wide range of products such as prescription medicines, over-the-counter drugs, surgical items, vaccines, diagnostic kits, and other healthcare products. The goal of the organization is to improve the availability of quality medicines and healthcare supplies to hospitals, clinics, and individual customers.

NATURE OF BUSINESS

The nature of business of Super Med Pharmacy Limited is primarily related to pharmaceutical retailing, distribution, and healthcare product supply. The company operates as a retail pharmacy outlet where customers can purchase medicines and medical products prescribed by doctors. Its business activities include retail sale of medicines, operation of sales offices, warehousing and storage of pharmaceutical products, and receiving and supplying healthcare goods and services. The company deals with various categories of healthcare products such as branded and generic medicines, medical devices, surgical consumables, health supplements, diagnostic products, and other pharmacy-related items.

In addition to retail operations, the company may function as a distribution point for pharmaceutical products by maintaining stock in warehouses and supplying medicines to healthcare institutions and pharmacies. The pharmacy industry plays an important role in the healthcare sector because it ensures that patients receive safe, effective, and authentic medicines in a timely manner. Super Med Pharmacy focuses on maintaining product quality, proper storage of medicines, and compliance with healthcare regulations. Through its retail services, the company contributes to improving healthcare accessibility by providing reliable pharmaceutical products and professional pharmacy support to the community.

MISSION STATEMENT

The mission of Super Med Pharmacy is: “To provide safe, reliable, and affordable pharmaceutical products while delivering professional healthcare services that promote the well-being of the community.”

The mission focuses on:

- Ensuring availability of genuine and certified medicines
- Providing accurate pharmaceutical advice
- Maintaining high ethical standards
- Offering affordable healthcare solutions
- Promoting patient safety and awareness

The organization aims to improve customer satisfaction through consistent quality service and professional commitment.

VISION STATEMENT

The vision of Super Med Pharmacy is: “To become a leading and trusted pharmacy recognized for excellence, innovation, and commitment to public health.”

The long-term vision includes:

- Expanding branch networks
- Implementing advanced pharmacy management systems
- Adopting digital billing and inventory tracking

- Building strong customer loyalty
- Supporting community healthcare initiatives

The pharmacy aspires to contribute positively to society by promoting preventive healthcare and awareness programs.

OBJECTIVES OF SUPERMED PHARMACY

The major objectives of the pharmacy include:

- To supply high-quality and authentic medicines.
- To ensure customer satisfaction through professional service.
- To maintain ethical standards in pharmaceutical practices.
- To provide affordable pricing for all healthcare products.
- To ensure compliance with legal and safety regulations.
- To promote awareness about proper medication usage.
- To expand services and product range continuously.

ORGANIZATIONAL STRUCTURE

Super Med Pharmacy follows a structured organizational system to ensure smooth operations.

Key Positions Include:

- Managing Director / Owner
- Pharmacist in Charge
- Assistant Pharmacists
- Sales Executives
- Inventory Manager
- Accounts and Billing Staff

Each member has defined roles and responsibilities to ensure efficiency in daily operations.

ABOUT THE BOARD / MANAGEMENT

The management or board of Super Med Pharmacy plays a crucial role in strategic decision-making and overall business operations.

Board Responsibilities:

- Formulating business policies and strategies
- Ensuring legal compliance
- Financial planning and budgeting
- Monitoring performance and growth
- Maintaining ethical standards
- The board ensures that the pharmacy operates according to pharmaceutical regulations and maintains high-quality service standards. They also oversee staff recruitment, training, and development to enhance service delivery.
- The management emphasizes transparency, accountability, and professional leadership in all aspects of the organization.

CORE VALUES

Super Med Pharmacy operates based on strong core values:

- Integrity – Honest and transparent dealings
- Quality Assurance – Supplying only certified medicines
- Customer-Centered Approach – Prioritizing patient health
- Professional Excellence – Qualified and trained staff
- Responsibility – Following legal and safety regulations
- These values guide the organization in achieving its mission and vision.

IMPORTANCE IN THE COMMUNITY

Super Med Pharmacy plays an important role in supporting public health by:

- Providing easy access to essential medicines
- Offering healthcare guidance
- Supporting preventive healthcare practices
- Building trust within the community
- By ensuring safe pharmaceutical services, the pharmacy contributes significantly to improving the overall health standards of society.

FUTURE PLANS

The future plans of Super Med Pharmacy include:

- Expansion to new locations
- Introduction of online ordering services
- Implementation of home delivery services
- Adoption of digital prescription management
- Collaboration with healthcare professionals
- The pharmacy aims to grow sustainably while maintaining quality and customer satisfaction.

CONCLUSION

Super Med Pharmacy is a reliable and community-focused pharmaceutical organization committed to providing quality medicines and professional healthcare services. With a clear mission, strong vision, ethical values, and effective management, the pharmacy continues to serve as a trusted healthcare partner. Through continuous improvement and customer-oriented services, Super Med Pharmacy aims to achieve long-term success and contribute positively to public healthy.

CHAPTER- IV

ANALYSIS AND INTERPRETATION OF DATA

GENDER WISE DISTRIBUTION OF THE EMPLOYEES

TABLE - 4.1

S.no	Gender	Number of Respondents	% of Respondents
1.	Male	48	48%
2	Female	52	52%
Total		100	100%

FIGURE 4.1

INFERENCE

From the above table 4.1, it is implied that in the super med pharmacy limited, 52% of respondents are female. 48% of respondents are male. Female employees are slightly higher than male employees. This shows balanced gender participation in the company. Gender distribution is almost equal.

AGE OF THE EMPLOYEES

TABLE 4.2

S.no	Age	Number of Respondents	% of Respondents
1.	20 – 30 years	45	45%
2.	31 – 40 years	30	30%
3.	41 – 50 years	15	15%
4.	Above 50 years	10	10%
Total		100	100%

FIGURE 4.2

INFERENCE

From the above Table 4.2, it is known that in the Super Med Pharmacy Limited, 48% of respondents belong to the 20–30 years age group. 30% belong to the 31–40 years age group. 12% belong to the 41–50 years age group. 10% belong to above 50 years. Young employees form the majority of the workforce.

CATEGORIES OF THE EMPLOYEES

TABLE 4.3

S.no	Categories	Number of Respondents	% of Respondents
1.	Permanent employees	43	43%
2.	Probation employees	30	30%
3.	Part-time employees	27	27%
Total		100	100%

FIGURE 4.3

INFERENCE

From the above Table 4.3, it is informed that in the Super Med Pharmacy Limited, 43% of respondents are permanent employees. 30% are probation employees. 27% are part-time employees. Permanent employees form the major category. This shows stability in employment structure.

MONTHLY INCOME OF THE EMPLOYEE

TABLE 4.4

S.no	Income (In Rs)	Number of respondents	% of Respondents
1.	Below ₹20,000	35	35%
2.	₹20,000 – ₹30,000	17	17%
3.	₹30,000 – ₹40,000	25	25%
4.	₹40,000 – ₹50,000	12	12%
5.	Above ₹ 50,000	11	11%
Total		100	100%

FIGURE 4.4

INFERENCE

From the above Table 4.4 it is clear that in the Super Med Pharmacy Limited, the majority of respondents belong to the below ₹20,000 income group. The next higher percentage belongs to ₹30,000 – ₹40,000. A smaller percentage falls under higher income categories. This shows that most employees receive moderate monthly income. The income distribution reflects the salary structure of the company.

EDUCATIONAL QUALIFICATION OF THE EMPLOYEES

TABLE 4.5

S.no	Educational qualification	Number of respondents	% of Respondents
1.	Under graduate	51	51%
2.	Post graduate	30	30%
3.	Diploma	12	12%
4.	Others	7	7%
Total		100	100%

FIGURE 4.5

INFERENCE

From the above table 4.5 it is known that in the Super Med Pharmacy Limited, 51% of respondents are undergraduates. 30% are postgraduates. 12% completed diploma, and 7% belong to other qualifications. Undergraduate employees form the majority. This indicates moderate educational qualification among employees.

WORK EXPERIENCE OF THE EMPLOYEES

TABLE 4.6

S.no	work experience (in years)	Number of Respondents	% of Respondents
1.	1 – 10 years	66	66%
2.	11-20 years	23	23%
3.	21-30 years	11	11%
4.	Above 30 years	0	0%
Total		100	100%

FIGURE 4.6

INFERENCE

From the above table 4.6, it is crystal clear that in the Super Med Pharmacy Limited, 66% of respondents have 1–10 years of experience. 23% have 11–20 years experiences. 11% have above 21 – 30 years experiences. 0% have above 30 years experiences. Most employees have lower years of experience. This shows a younger working population.

PERFORMANCE APPRAISAL SYSTEM

TABLE 4.7

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	The performance appraisal system is clearly defined in the organization.	49	43	4	3	1
2.	The appraisal process is conducted regularly.	39	45	10	5	1
3.	Performance standards are communicated clearly to employees.	39	33	16	4	8
4.	The appraisal system helps in identifying employee strengths.	38	36	15	9	2
5.	The appraisal system is aligned with organizational objectives.	43	28	16	4	9

FIGURE 4.7

INFERENCE

From the above table 4.7, in Super Med Pharmacy Limited most of the respondents 49% strongly agree that the performance appraisal system is clearly defined in the organization. 45% agree that the appraisal process is conducted regularly. 39% strongly agree that performance standards are clearly communicated to employees. 38% strongly agree that the appraisal system helps identify employee strengths. 43% strongly agree that the appraisal system is aligned with organizational objectives. This indicates that employees have a positive opinion regarding the appraisal system.

FAIRNESS AND OBJECTIVITY IN APPRAISAL

TABLE 4.8

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	performance appraisal system is free from personal bias.	59	25	14	0	2

Between column	SSC = 244.5	C-1=4	MSC=SSC/C-1 =61.125	61.125/58.233 =1.0496
Within Column	SSE = 873.5	N-C =15	MSE=SSE/N-C =58.233	
Total	SST=1118	19		

Degree of freedom = [15,4]

Level Of Significant =5%

Level Of Value 5%=3.10

Calculated Value =1.0496

INFERENCE

Since the calculated F value (1.0496) is less than the table value (3.10), the null hypothesis is accepted at 5% significance level. This indicates that there is no significant difference between the group means under study. Therefore, the variation observed among the samples may be due to chance rather than actual differences. The result shows that the selected factor does not significantly influence the variable being tested. Hence, the groups are statistically similar in their mean performance. ANOVA confirms that the differences are not strong enough to reject the null hypothesis.

$$T=100$$

$$T^2/ N= [100]^2/20$$

$$=500$$

$$SST=\Sigma X_1^2+\Sigma X_2^2+\Sigma X_3^2+\Sigma X_4^2+\Sigma X_5^2 - CF$$

$$=670+401+70+22+5 - 500$$

$$=1168 -500$$

$$= 668$$

$$SSC=\frac{SX_1^2}{N_1} + \frac{SX_2^2}{N_1} + \frac{SX_3^2}{N_1} + \frac{SX_4^2}{N_1} + \frac{SX_5^2}{N_1}$$

$$SSC= \frac{44^2}{4} + \frac{31^2}{4} + \frac{14^2}{4} + \frac{8^2}{4} + \frac{5^2}{4}$$

$$=484+240.25+49+16+6.25$$

$$= 795.5 - 500$$

$$= 295.5$$

$$SSR = \frac{SY1^2}{N_2} + \frac{SY2^2}{N_2} + \frac{SY3^2}{N_2} + \frac{SY4^2}{N_2} + \frac{SY5^2}{N_2}$$

$$= \frac{51^2}{5} + \frac{30^2}{5} + \frac{12^2}{5} + \frac{7^2}{5}$$

$$= 520.25 + 180 + 4.8 + 9.8 - 500$$

$$= 714.8 - 500$$

$$= 214.8$$

$$SSE = 668 - 295.5 - 214.8$$

$$= 157.7$$

ANOVA TABLE

TWO WAY CLASSIFICATION

Sources of variation	Sum of squares	Degree of freedom	Mean sum of squares	F-ratio
Between column	SSC=295.5	C-1=4	MSC=SSC/C-1 =73.875	73.875/13.146 =5.619
Between Row	SSR=214.8	R-1=3	MSR=SSR/R-1 =71.6	71.6/13.146 =5.446
Residual (Error)	SSE=157.7	N-C-R =12	MSE=SSE/N-C-R =13.146	
Total	SST= 668	19		

Degree of freedom = (12,4)&(12,3)

Level Of Significant=5%

Level Of Value 5%= 4.43&3.87

Calculated Value = 5.619&5.446

INFERENCE

Since the calculated F value 5.619 is greater than the table value 4.43, the null hypothesis is rejected at the 5% significance level for degree of freedom (12,4). This indicates that there is a significant difference between the group means, and the factor considered has a meaningful influence on the variable under study. Similarly, for df (12,3), the calculated F value 5.446 is greater than the table value 3.87, so the null hypothesis is again rejected. This also shows a statistically significant difference among the groups. Therefore, the variations observed are not due to chance alone but reflect actual differences in the data. ANOVA confirms that the selected variables have a significant effect on the study outcome.

TEST-3

CHI SQUARE

COMPARISON BETWEEN EMPLOYEE AGE AND SATISFACTION WITH THE PERFORMANCE APPRAISAL SYSTEM

H₀: There is no significant difference between employee age and satisfaction with the performance appraisal system.

H₁: There is significant difference between employee age and satisfaction with the performance appraisal system.

CHI-SQUARE

Employee Age	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
20-30 years	33	7	3	1	1	45
31-40 years	22	5	3	0	0	30
41-50 years	12	2	1	0	0	15
Above 50 years	7	2	1	0	0	10
Total	74	16	8	1	1	100

EXPECTED FREQUENCY= ROW TOTAL X COLUMN TOTAL

GRAND TOTAL

Employee Age	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
20-30 years	33.3	7.2	3.6	0.45	0.45
31-40 years	22.2	4.8	2.4	0.30	0.30
41-50 years	11.1	2.4	1.2	0.15	0.15
Above 50 years	7.4	1.6	0.8	0.1	0.1

O	E	O-E	(O-E)²	(O-E)²/E
33	33.3	-0.3	0.09	0.002703
7	7.2	-0.2	0.04	0.0055
3	3.6	-0.6	0.36	0.1
1	0.45	0.55	0.3025	0.67222
1	0.45	0.55	0.3025	0.67222
22	22.2	-0.2	0.04	0.001802
5	4.8	-0.2	0.04	0.008333
3	2.4	0.6	0.36	0.15
0	0.3	-0.3	0.09	0.3
0	0.3	-0.3	0.09	0.3
12	11.4	0.6	0.36	0.31579
2	2.4	-0.4	0.16	0.06667
1	1.2	-0.2	0.04	0.03333
0	0.15	-0.15	0.0225	0.15
0	0.15	-0.15	0.0225	0.15

2	1.6	0.4	0.16	0.1
1	0.8	0.2	0.04	0.05
0	0.1	-0.1	0.01	0.1
0	0.1	-0.1	0.01	0.1
Total				3.016038

Degree Of Freedom= $R-1 \times C-1$

$$4-1=3$$

$$5-1=4$$

$$3 \times 4=12$$

Calculated Value = 3.016030

Level Of Significance @ 5% = 21.026

INFERENCE

Since the calculated Chi-square value (3.016030) is less than the table value (21.026), the null hypothesis is accepted at the 5% significance level. This means there is no significant association between the variables under study. The observed variation may be due to random chance and not because of a meaningful relationship between the factors. Therefore, the variables are statistically independent in this analysis. The result indicates that the selected factor does not have a significant influence on the outcome being tested. Hence, the null hypothesis is retained.

TEST-4

CHI SQUARE

COMPARATIVE TEST BETWEEN EMPLOYEE JOB STATUS AND THEIR PROMOTION.

H₀: There is no significant difference between employee job status and their promotion.

H₁: There is significant difference between employee job status and their promotion.

CHI SQUARE

Employee Job status	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Permanent employee	21	12	6	2	2	43
Probation employee	16	9	3	1	1	30
Part time employee	15	5	4	2	1	27
Total	52	26	13	5	4	100

EXPECTED FREQUENCY= ROW TOTAL X COLUMN TOTAL

GRAND TOTAL

Employee Job Status	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Permanent employee	22.36	11.18	5.59	2.15	1.72
Probation employee	15.6	7.80	3.9	1.50	1.20
Part time employee	15	5	4	2	1

O	E	O-E	(O-E)²	(O-E)²/E
21	22.36	-1.36	1.8496	0.0827
12	11.18	0.82	0.6724	0.0601
6	5.59	0.41	0.1681	0.0300
2	2.15	-0.15	0.0225	0.0104
2	1.72	0.28	0.0784	0.0455

9	7.80	1.2	1.44	0.1846
3	3.9	-0.9	0.81	0.2076
1	1.50	0.50	0.25	0.1667
1	1.20	0.20	0.04	0.0333
15	14.04	0.96	0.9216	0.0656
5	7.02	2.02	4.0804	0.5812
4	3.55	0.49	0.2401	0.0676
2	1.35	0.65	0.4225	0.3129
1	1.08	-0.08	0.0064	0.0059
Total				1.8643

Degree Of Freedom= $R-1 \times C-1$

$$3-1=2$$

$$5-1=4$$

$$2 \times 4=8$$

Calculated Value = 1.8643

Level Of Significance @ 5% = 15.507

INFERENCE

Since the calculated Chi-square value 1.8643 is less than the table value 15.507, the null hypothesis is accepted and the alternative hypothesis is rejected. This indicates that there is no significant association between the selected variables in the study. The responses obtained from employees do not show major variation between the compared factors. Therefore, the variables are statistically independent in this analysis. The result shows that the selected demographic factor does not significantly influence employee opinion regarding the performance appraisal system. Hence, the relationship between the variables is not strong under the given level of significance.

TEST -5

F-TEST

COMPARISON BETWEEN EMPLOYEE ORGANIZATIONAL PERFORMANCE BASED ON GENDER

H₀: There is no significant difference between employee organizational Performance based on gender.

H₁: There is significant difference between employee organizational Performance based on gender.

Gender	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Male	25	10	8	3	2	48
Female	28	12	9	2	1	52
Total	53	22	17	5	3	100

$$\bar{x} = 9.6$$

$$\bar{y} = \frac{52}{5}$$

$$\bar{y} = 10.4$$

X	X- $\bar{x}$ X-9.6	(X- $\bar{x}$) ² (X-9.6) ²	Y	Y- $\bar{y}$ Y-10.4	(Y- $\bar{y}$) ² (Y-10.4) ²
25	15.4	237.16	28	17.6	309.76
10	0.4	0.16	12	1.6	2.56
8	-1.6	2.56	9	-1.4	1.96
3	-6.6	43.56	2	-8.4	70.56
2	-7.6	57.76	1	-9.4	88.36
= 48		341.2	= 52		473.2

$$F = S_1^2 / S_2^2$$

$$S_1 = \frac{341.2}{5 - 1}$$

$$S_1 = \frac{341.2}{4}$$

$$S_1 = 85.3$$

$$S_2 = \frac{473.2}{5 - 1}$$

$$S_2 = \frac{473.2}{4}$$

$$S_2 = 118.3$$

$$F = \frac{85.3}{118.3}$$

$$F = 0.7210$$

Calculated Value = 0.7210

Degree of Freedom = (5-1), (5-1)

Table Value = 2.42

INFERENCE

Since the calculated F value (0.7210) is less than the table value (2.42), the null hypothesis is accepted at the 5% significance level. This indicates that there is no significant difference between the variances of the two samples under study. The variation observed between the groups is considered statistically insignificant and may have occurred due to random fluctuation. Therefore, both samples can be treated as having equal variance. The result suggests that the selected variables do not show a major difference in variability. Hence, the null hypothesis is retained based on the F-test result.

TEST -6

F-TEST

COMPARSION BETWEEN TRAINING EFFECTIVENESS BASED ON THE GENDER OF THE EMPLOYEE

H₀: There is no significant difference between training effectiveness based on the gender of the employee.

H₁: There is significant difference between training effectiveness based on the gender of the employee.

Gender	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Male	22	15	8	2	1	48
Female	26	18	5	2	1	52
Total	48	33	13	4	2	100

$$\bar{x} = \frac{48}{5}$$

$$\bar{x} = 9.6$$

$$\bar{y} = \frac{52}{5}$$

$$\bar{y} = 10.4$$

X	X- $\bar{x}$ X-9.6	(X- $\bar{x}$) ² (X-9.6) ²	Y	Y- $\bar{y}$ Y-10.4	(Y- $\bar{y}$) ² (Y-10.4) ²
22	12.4	153.76	26	15.6	243.36
15	5.4	29.16	18	7.6	57.76
8	-1.6	2.56	5	-5.4	29.16
2	-7.6	57.76	2	-8.4	70.56
1	-8.6	73.96	1	-9.4	88.36
= 48		317.2	= 52		489.2

$$F = S_1^2 / S_2^2$$

$$S_1 = \frac{317.2}{5 - 1}$$

$$S_1 = \frac{317.2}{4}$$

$$S_1 = 79.3$$

$$S_2 = \frac{489.2}{5 - 1}$$

$$S_2 = \frac{489.2}{4}$$

$$S_2 = 122.3$$

$$F = \frac{79.3}{122.3}$$

$$F = 0.6484$$

Calculated Value = 0.6484

Degree Of Freedom = (5-1), (5-1)

Table Value = 6.39

INFERENCE

Since the calculated F value (0.6484) is less than the table value (2.42), the null hypothesis is accepted at the 5% significance level. This indicates that there is no significant difference between the variances of the two samples considered in the test. The observed variation is statistically insignificant and may be due to random sampling fluctuation. Therefore, both sample groups are considered to have homogeneous variance. The F-test result suggests that the selected variables do not differ substantially in variability. Hence, the null hypothesis is retained and the data supports equality of variance between the groups.

TEST-7

CORRELATION

TO FIND OUT CORRELATION BETWEEN EMPLOYEE PERFORMANCE FEEDBACK AND EMPLOYEE MOTIVATION TO PERFORM

Basis	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Employee Performance feedback	59	19	15	2	5	100
Employee motivation to perform	56	27	11	3	3	100

X	Y	X ²	Y ²	XY
59	56	3481	3136	3304
19	27	361	729	513
15	11	225	121	165
2	3	4	9	6
5	3	25	9	15
100	100	4096	4004	4003

$$r = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum X^2 - (\sum X)^2} \times \sqrt{N \sum Y^2 - (\sum Y)^2}}$$

$$r = \frac{(5) (4003) - (100 \times 100)}{\sqrt{(5) (4096) - (100)^2} \times \sqrt{(5) (4004) - (100)^2}}$$

$$r = \frac{20,015 - 10,000}{\sqrt{20,480 - 10,000} \times \sqrt{20,020 - 10,000}}$$

$$r = \frac{10,015}{\sqrt{10,480} \times \sqrt{10,020}}$$

$$r = \frac{10,015}{102.3718 \times 100.0999}$$

$$r = \frac{10,015}{10,247}$$

$$r = \mathbf{0.9773}$$

INFERENCE

The correlation coefficient of 0.9774 indicates a very strong positive relationship between the two variables under study. This suggests that as one variable increases, the other variable tends to increase in almost a proportional manner. The closeness of this value to 1 implies that the relationship is highly linear and consistent. Such a strong correlation reflects minimal deviations from the trend, indicating reliable predictability between the variables. It also suggests that any interventions or changes in one variable are likely to correspond to significant changes in the other. However, while the correlation is strong, it does not imply causation; external factors may also influence the observed relationship. Overall, the high correlation highlights the strong association and interdependence between the variables measured.

TEST-8

CORRELATION

**TO FIND OUT CORRELATION BETWEEN REWARDS AND
RECOGNITION PROVIDE TO EMPLOYEE AND PERFORMANCE
IMPROVEMENT OF EMPLOYEE**

Basis	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Rewards and recognition	39	30	20	8	3	100
Improvement of employee	45	29	15	6	5	100

X	Y	X²	Y²	XY
39	45	1521	2025	1755
30	29	900	841	870
20	15	400	225	300
8	6	64	36	48
3	5	9	25	15
100	100	2894	3152	2988

$$r = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum X^2 - (\sum X)^2} \times \sqrt{N \sum Y^2 - (\sum Y)^2}}$$

$$r = \frac{(5)(2988) - (100 \times 100)}{\sqrt{(5)(2894) - (100)^2} \times \sqrt{(5)(3152) - (100)^2}}$$

$$r = \frac{14,940 - 10,000}{\sqrt{14,470 - 10,000} \times \sqrt{15,760 - 10,000}}$$

$$r = \frac{4940}{\sqrt{4470} \times \sqrt{5760}}$$

$$r = \frac{4940}{66.85 \times 75.89}$$

$$r = \frac{4940}{5073.2}$$

$$r = 0.9737$$

Inference

The correlation coefficient of 0.9737 indicates a very strong positive relationship between the two variables being analyzed. This suggests that as one variable increases, the other variable tends to increase in a highly consistent manner. The closeness of this value to 1 reflects a strong linear association with minimal deviations from the trend. Such a strong correlation signifies that the variables are closely aligned and changes in one are reliably associated with changes in the other. While the relationship is clear, it is important to note that correlation does not imply causation. External factors or confounding variables may also contribute to this association. Overall, this high correlation underscores a strong interdependence and predictable pattern between the variables.

TEST-9

REGRESSION

COMPARISON BETWEEN EMPLOYEE TRAINING RECEIVED AND CAREER GROWTH OF EMPLOYEE

Source	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Training received	39	35	13	7	6	100
Career growth	38	28	19	9	6	100

X	Y	X ²	Y ²	XY
39	38	1521	1444	1482
35	28	1225	784	980
13	19	169	361	247
7	9	49	81	63
6	6	36	36	36
100	100	3000	2706	2808

N=5

X on Y

$$b_{xy} = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum Y^2 - (\sum Y)^2}}$$

$$b_{xy} = \frac{5(2808) - (100)(100)}{5(2706) - (100)(100)}$$

$$b_{xy} = \frac{14040 - 10000}{13530 - 10000}$$

$$b_{xy} = \frac{4040}{3530}$$

$$r = 1.144$$

Y on X

$$b_{yx} = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum x^2 - (\sum x)^2}}$$

$$b_{yx} = \frac{5(2808) - (100)(100)}{5(3000) - (100)(100)}$$

$$b_{yx} = \frac{14040 - 10000}{15000 - 10000}$$

$$b_{yx} = \frac{4040}{5000}$$

$$r = 0.808$$

$$r = \sqrt{b_{xy} \times b_{yx}}$$

$$r = \sqrt{1.144 \times 0.808}$$

$$r = 0.9614$$

INFERENCE

Since the regression coefficient value (0.9614) is very close to 1, it indicates a strong positive relationship between the independent variable and dependent variable. This means that when the independent variable increases, the dependent variable also tends to increase in a consistent manner. The regression result shows that the predictor variable has a strong influence on the outcome variable. A value of 0.9614 suggests that the fitted regression line explains the relationship effectively and the data points are closely associated with the trend.

TEST 10

REGRESSION

COMPARISON BETWEEN SUPERVISOR SUPPORT AND EMPLOYEE JOB SATISFICATION.

Source	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree	Total
Supervisor support	52	28	9	5	6	100
Employee job Satisfication	30	32	22	12	4	100

X	Y	X ²	Y ²	XY
52	30	2704	900	1560
28	32	784	1024	896
9	22	81	484	198
5	12	25	144	60
6	4	36	16	24
100	100	3630	2568	2738

N=5

X on Y

$$b_{xy} = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum Y^2 - (\sum Y)^2}}$$

$$b_{xy} = \frac{5(2738) - (100)(100)}{5(2568) - (100)(100)}$$

$$b_{xy} = \frac{13690 - 10000}{12840 - 10000}$$

$$b_{xy} = \frac{3690}{2840}$$

$$r = 1.299$$

Y on X

$$b_{xy} = \frac{N \sum XY - \sum X \sum Y}{\sqrt{N \sum X^2 - (\sum X)^2}}$$

$$b_{xy} = \frac{5(2738) - (100)(100)}{5(3630) - (100)(100)}$$

$$b_{xy} = \frac{13690 - 10000}{18150 - 10000}$$

$$b_{xy} = \frac{3690}{8150}$$

$$r = 0.4527$$

$$r = \sqrt{b_{xy} \times b_{yx}}$$

$$r = \sqrt{1.299 \times 0.4527}$$

$$r = 0.589$$

INFERENCE

The regression coefficient value of 0.5899 indicates a moderate positive relationship between the independent variable and dependent variable. This means that changes in the independent variable lead to a corresponding increase in the dependent variable, but the relationship is not very strong. The regression result shows that the predictor variable has a noticeable influence on the outcome variable. Since the value is above 0.5, the relationship can be considered meaningful and useful for analysis.

CHAPTER V

FINDINGS, SUGGESTIONS, CONCLUSION

The study on employee performance appraisal reveals the following the following findings:

- From Table 4.1, The data shows that female employees constitute a slightly higher percentage compared to male employees in the organization. This indicates that the company promotes gender equality and provides equal opportunities for all employees. Such representation helps in building a diverse and inclusive work culture. It also enhances creativity and decision-making within the organization.
- Male employees also represent a significant portion of the workforce, contributing to overall balance. The near-equal distribution ensures that no gender is underrepresented in the workplace. This balance reflects fair recruitment and selection practices. It also improves team collaboration and organizational harmony.
- The gender diversity observed in the organization reflects modern workforce trends. Companies today focus on inclusivity to improve productivity and innovation. A balanced workforce leads to better employee satisfaction and retention. Thus, gender distribution plays a key role in organizational success.
- From Table 4.2, The majority of employees fall under the age group of 20–30 years. This indicates that the organization has a young and energetic workforce. Young employees tend to be more adaptable to changes and new technologies. They contribute to innovation and dynamic work environments.
- Employees in the age group of 31–40 years also form a considerable portion. This group provides stability and experience to the organization. They often take up leadership and decision-making roles. Their presence ensures a balance between energy and experience.

- A smaller percentage of employees belong to higher age groups above 40 years. This indicates limited senior-level experience within the organization. However, it may also reflect a focus on hiring younger talent. This trend can impact long-term organizational knowledge retention.
- From the table 4.3, Permanent employees form the largest group in the organization. This indicates job security and stability for a majority of employees. Such stability improves employee commitment and performance. It also reflects strong organizational policies and structured employment practices.
- Probationary employees represent a significant portion of the workforce. This shows that the organization is continuously recruiting new talent. It helps in evaluating employee performance before confirmation. This process ensures quality hiring and workforce development.
- Part-time employees also contribute to the workforce structure. This reflects flexibility in employment practices. Such arrangements help in managing workload efficiently. It also reduces operational costs for the organization.
- From Table 4.4, A large number of employees earn below ₹20,000 per month. This indicates that many employees are in entry-level positions. It reflects the presence of a junior workforce in the organization. Such salary levels may influence employee satisfaction and retention.
- Employees earning between ₹30,000 and ₹40,000 form a moderate group. This shows the existence of mid-level employees in the organization. They contribute significantly to operational activities. This group bridges the gap between junior and senior levels.
- Only a small percentage of employees earn higher salaries. This indicates a limited number of senior or managerial roles. It reflects a hierarchical salary structure in the organization. Such distribution is common in developing organizations.

- From Table 4.5, The majority of employees are undergraduates. This indicates a moderate level of educational qualification within the organization. It suggests that the company hires candidates with basic qualifications. Such employees can be trained effectively for job-specific roles.
- Postgraduate employees also form a significant portion. This reflects the availability of skilled and knowledgeable employees. They contribute to higher-level tasks and decision-making processes. Their presence enhances organizational efficiency and productivity.
- A small number of employees belong to diploma or other categories. This indicates limited technical or specialized qualifications. However, they may possess practical skills relevant to their roles. This adds diversity to the workforce.
- From Table 4.6, Most employees have less work experience. This indicates a relatively new and developing workforce. Such employees are easier to train and adapt quickly. They bring fresh ideas and enthusiasm to the organization.
- Employees with moderate experience form a stable group. They contribute to both operational efficiency and team guidance. Their experience helps in solving practical problems. They act as a bridge between junior and senior employees.
- A smaller number of employees have high experience levels. This indicates limited senior expertise in the organization. Such employees are crucial for leadership and decision-making roles. Their knowledge supports long-term organizational growth.
- From Table 4.7, Most employees are aware of the performance appraisal system in the organization. This indicates effective communication between management and employees. Awareness helps employees understand evaluation standards. It also improves overall performance.

- Some employees show neutral responses regarding the appraisal system. This suggests a lack of clarity or understanding about the process. Proper communication and training can improve awareness. It ensures better participation in evaluations.
- A small percentage of employees are unaware of the appraisal system. This indicates a communication gap within the organization. Such gaps may affect employee performance. Immediate attention is required to address this issue.
- From table 4.8 The majority of employees perceive the appraisal system as fair. This reflects a strong and unbiased evaluation process. Fairness increases employee trust in management. It also enhances job satisfaction.
- Some employees are neutral about the fairness of the system. This indicates uncertainty in evaluation criteria. It may be due to lack of feedback or explanation. Clear communication can improve perception.
- A small percentage feel the system is unfair. This suggests possible bias or inconsistency in evaluations. Such perceptions can reduce employee morale. Corrective measures are necessary to ensure fairness.
- From table 4.9 Most employees receive feedback after the appraisal process. This indicates that the organization values employee development. Feedback helps employees understand their strengths and weaknesses. It supports continuous improvement.
- Some employees receive limited or unclear feedback. This suggests that feedback mechanisms are not fully effective. Lack of proper guidance may affect performance improvement. Structured feedback sessions can help resolve this.

- A small number of employees do not receive feedback. This indicates a gap in the appraisal process. Without feedback, employees cannot improve effectively. Ensuring feedback for all is essential.
- From the table 4.10 Most employees agree that appraisal systems improve their performance. This indicates that evaluations motivate employees to work better. Recognition and rewards encourage higher productivity. It creates a performance-driven culture.
- Some employees are neutral about the impact of appraisal. This suggests that the system may not influence all employees equally. Lack of proper incentives may be a reason. Enhancing reward systems can increase effectiveness.
- A few employees feel that appraisal has no impact on performance. This indicates dissatisfaction or lack of trust in the system. It may reduce employee motivation. Improving appraisal strategies is necessary.
- From Table 4.11, appraisal results influence promotion decisions in the organization. Employees believe that better performance leads to higher career opportunities. Promotion based on appraisal improves fairness. It motivates employees to work sincerely. This strengthens performance orientation.
- Rewards linked with appraisal improve employee morale. Employees feel recognized for their contribution to organizational success. Reward systems encourage healthy competition. It also increases commitment toward work. Recognition improves job satisfaction.
- From Table 4.12, employees agree that appraisal includes important job-related criteria. Work quality, punctuality, and responsibility are considered during evaluation. Clear criteria improve accuracy in assessment. Employees understand how performance is measured. This helps maintain accountability.

- Measurable standards in appraisal improve employee acceptance of results. Employees feel more confident when evaluation is based on actual performance data. Objective standards reduce confusion. It also supports equal treatment. This increases satisfaction with the system.

- From Table 4.13, supervisors play an important role in employee performance improvement. Guidance from supervisors helps employees correct mistakes quickly. Supportive supervision increases confidence among employees. It also improves communication between staff and management. This contributes to better teamwork.

- From Table 4.14, appraisal helps identify employee training needs effectively. Employees with performance gaps can receive proper development support. Training improves skill levels and work efficiency. It also prepares employees for future responsibilities. This supports long-term organizational development.

- Employees believe that training based on appraisal results improves job performance. Learning opportunities increase confidence and competence. Development activities help employees handle responsibilities better. It also improves adaptability to work changes. This strengthens productivity.

- From Table 4.15, most employees are satisfied with the performance appraisal system followed in the organization. Satisfaction indicates acceptance of appraisal practices. A positive appraisal experience improves morale. It also strengthens employee commitment. This benefits organizational performance.

- Employees feel appraisal supports personal growth in their careers. Regular review helps them understand improvement areas. Career guidance through appraisal increases motivation. Employees become more goal-oriented. This encourages professional development.

- The study shows that performance appraisal is an important human resource practice in the organization. It supports evaluation, motivation, and development together. Employees generally accept the appraisal system positively. Appraisal improves communication between management and staff. It contributes to organizational effectiveness.
- Test 1 ANOVA results indicate that there is a significant difference among group means in most of the tests conducted. This shows that the independent variable has an impact on the dependent variable. The variation observed is not due to chance. Hence, the null hypothesis is rejected in these cases.
- In some instances, the ANOVA test shows no significant difference among group means. This indicates that all groups have similar responses. The variation is due to random factors. Therefore, the null hypothesis is accepted in such cases.
- Overall, the ANOVA analysis reveals that certain factors significantly influence employee responses, while others do not. This helps in identifying key variables affecting performance and satisfaction. It provides deeper insights into group behavior. These findings support better managerial decisions.
- Test 2 Chi-square analysis reveals that there is a significant association between the selected categorical variables in most cases. This indicates that the variables are not independent of each other. The relationship observed is statistically meaningful. Hence, the null hypothesis is rejected for the majority of the tests.
- In certain cases, the calculated Chi-square value is less than the table value. This shows that there is no significant relationship between the variables. The observed differences are due to random variation. Therefore, the null hypothesis is accepted in those specific cases.
- Overall, the Chi-square tests highlight that some variables are interdependent while others are independent. This mixed result helps in identifying which factors influence employee

behavior. It supports better understanding of relationships between variables. Such insights are useful for effective decision-making.

- From test 3 F-test result shows whether there is a significant difference between the selected variables in the study. When the calculated F value is lower than the table value, the null hypothesis is accepted. This indicates that the variation between groups is not statistically significant. Employee responses remain similar across the selected categories. It also shows consistency in employee opinion regarding the variables tested.
- F-test suggests that the selected demographic factor does not strongly influence employee responses. Differences observed among respondents are only minor and occur by chance. This means the organizational factor studied is experienced similarly by different employee groups. Uniformity in responses reflects fairness in organizational practices. Statistical stability improves reliability of the findings.
- The F-test confirms that the compared variables do not produce major differences in employee perception. This suggests that organizational policies are uniformly applied. Employees from different categories show similar understanding of appraisal practices. Such consistency strengthens interpretation of the study results. It also indicates stable management practices.
- Test 4 correlation result shows a strong positive relationship between selected variables. Increase in one variable leads to increase in another variable. This indicates close connection between employee factors studied. Strong relationship supports importance of both variables.
- A high correlation coefficient confirms consistency in employee responses. Variables move together in a similar direction. This strengthens analytical reliability. It also supports interpretation of employee behaviour.

- Positive correlation suggests that improvement in one performance factor influences another positively. This supports integrated human resource development. Related variables contribute jointly to appraisal effectiveness.
- Test 5 regression result shows the extent to which one variable influences another variable in the study. A higher regression value indicates stronger predictive relationship between variables. This means one factor contributes significantly to changes in another factor. Regression helps explain employee behavior more clearly. It strengthens interpretation of performance appraisal relationships.
- A positive regression value indicates that improvement in one variable leads to improvement in another variable. For example, better feedback may improve employee skill development. This suggests that organizational factors are interconnected. Management can use this relationship for better decision making. It supports strategic planning in human resource practices.
- Regression analysis confirms that selected independent variables contribute meaningfully to employee outcomes. This helps identify important factors affecting appraisal effectiveness. The result supports practical understanding of performance-related factors. Regression findings improve the scientific value of the study. It also strengthens overall statistical interpretation.

SUGGESTIONS

- The organization should clearly communicate performance standards and evaluation criteria to employees at the beginning of the appraisal period. When employees understand the expectations and performance goals clearly, they can work more effectively and align their efforts with organizational objectives.
- Although many employees believe the appraisal system is fair, some employees expressed concerns regarding equal treatment and fairness. Therefore, the company should maintain greater transparency in the appraisal process by clearly explaining the methods, criteria, and evaluation procedures used for performance assessment.
- Employees should receive continuous feedback throughout the year rather than only during the appraisal period. Regular feedback helps employees understand their strengths and weaknesses and allows them to improve their performance in a timely manner.
- Supervisors play a crucial role in the performance appraisal system. They should provide consistent guidance, support, and mentoring to employees. Regular interaction between supervisors and employees can help clarify performance expectations and improve employee performance.
- The appraisal results should be effectively used to identify employee training and development needs. The organization should conduct regular training programs to improve employees' technical skills, communication abilities, and professional knowledge.
- The company should strengthen the link between performance appraisal and career development opportunities. Promotions, rewards, and career advancement should be clearly based on appraisal results to motivate employees and encourage higher levels of performance.
- Employees should be given an opportunity to participate actively in the appraisal process. They should be encouraged to express their opinions, provide self-assessments, and discuss their performance with supervisors. This participative approach increases employee satisfaction and trust in the system.

- The organization should introduce more recognition programs for high-performing employees. Rewards such as salary increments, bonuses, appreciation certificates, or promotions can motivate employees and encourage healthy competition within the organization.
- To avoid any form of bias or inconsistency, the organization should ensure that all employees are evaluated based on the same performance criteria. Standardized appraisal formats and guidelines should be followed to maintain fairness in evaluation.
- Although employees believe salary increments are linked to appraisal results, the company should make this connection clearer. A well-defined compensation policy based on performance appraisal will increase employee motivation and job satisfaction.
- The organization should conduct career counselling sessions during the appraisal process. Employees should receive guidance on career growth opportunities, skill development, and long-term professional goals.
- The company can improve the effectiveness of the appraisal system by adopting modern appraisal techniques such as 360-degree feedback, self-appraisal systems, and performance management software. These methods provide a more comprehensive evaluation of employee performance.
- Instead of treating performance appraisal as a yearly activity, the organization should implement a continuous performance management system. This approach ensures regular monitoring, evaluation, and improvement of employee performance.
- Management should focus on building a supportive and positive work environment where employees feel valued and motivated. A healthy organizational culture will increase employee engagement and improve the effectiveness of the appraisal system.

CONCLUSION

The study on performance appraisal at Super Med Pharmacy Limited shows that the majority of employees have a positive opinion about the existing appraisal practices followed in the organization. Most respondents agreed that the appraisal system is clearly defined, regularly conducted, and helpful in evaluating employee performance. The findings indicate that employees understand the appraisal procedures and consider them an important part of organizational functioning. A well-structured appraisal system has helped the company maintain fairness and improve employee confidence in evaluation.

The analysis also reveals that performance appraisal plays an important role in motivating employees and improving job satisfaction. A large percentage of respondents stated that appraisal helps in identifying strengths, training needs, and opportunities for career growth. Employees believe that feedback after appraisal supports performance improvement and enables them to understand their work expectations more clearly. The connection between appraisal, promotion, rewards, and salary improvement has further increased employee interest in achieving better performance.

Overall, the study concludes that the performance appraisal system followed in Super Med Pharmacy Limited is satisfactory and contributes positively to employee development and organizational effectiveness. Although the present system is accepted by most employees, continuous improvement in communication, feedback quality, and fairness can further strengthen the appraisal process. A transparent and employee-oriented appraisal system will help the company improve productivity, employee morale, and long-term growth.

STUDY ON EMPLOYEE PERFORMANCE APPRAISAL

1)DEMOGRAPHIC DETAILS:

1. Name:

2. Gender:

- ☐ Male
- ☐ Female

3. Age:

- ☐ 20 – 30 years
- ☐ 31 – 40 years
- ☐ 41 – 50 years
- ☐ Above 50 years

4. Category of Employee:

- ☐ Permanent employee
- ☐ Probation employee
- ☐ Part time employee

5. Educational Qualification:

- ☐ Under graduate
- ☐ Post graduate
- ☐ Diploma
- ☐ Others

6. Monthly Income Level:

- ☐ Less than rs20,000
- ☐ Rs20,000 – Rs30,000
- ☐ Rs30,001 – Rs40,000
- ☐ Above Rs50,000

7. Work Experience:

- ☐ Less than 10 years
- ☐ 10 – 20 years
- ☐ 20 – 30 years
- ☐ Above 30 years

2) PERFORMANCE APPRAISAL SYSTEM

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-disagree, SDA- strongly disagree

S.no	Statement	SA	A	N	DA	SDA
1.	The performance appraisal system is clearly defined in the organization.					
2.	The appraisal process is conducted regularly.					
3.	Performance standards are communicated clearly to employees.					
4.	The appraisal system helps in identifying employee strengths.					
5.	The appraisal system is aligned with organizational objectives.					

3) FAIRNESS AND OBJECTIVITY IN APPRAISAL

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-disagree, SDA- strongly disagree

S.no	Statement	SA	A	N	DA	SDA
1.	performance appraisal system is free from personal bias.					
2.	Employee are evaluated based on job – related criteria.					
3.	The performance appraisal process is transparent and fair.					
4.	All employee are treated as equally during appraisal.					
5.	The performance appraisal ratings accurately reflects actual performance.					

4) PERFORMANCE FEEDBACK AND COMMUNICATION.

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	Feedback is provided after performance appraisal.					
2.	Feedback helps employees understand their performance level.					
3.	Supervisors discuss appraisal results openly with employees.					
4.	Constructive suggestions are given for improvement.					
5.	Employees can express their views during appraisal discussions.					

5)IMPACT OF PERFORMANCE APPRAISAL

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	Performance appraisal motivates employees to perform better.					
2.	Appraisal results help in identifying training needs.					
3.	The appraisal system improves job satisfaction.					
4.	Performance appraisal helps in career development.					
5.	Appraisal outcomes improve overall employee performance.					

6)APPRAISAL AND REWARDS

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree .

S.no	Statement	SA	A	N	DA	SDA
1.	Performance appraisal is linked to promotions.					
2.	Salary increments are based on appraisal results.					
3.	The performance appraisal system encourages healthy compensation among employees.					
4.	High Performance are recognized and rewarded.					
5.	Appraisal outcomes are used for fair decision -making.					

7) APPRAISAL METHODS AND CRITERIA

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	The appraisal method used is appropriate for my job role.					
2.	Clear performance criteria are set at the beginning of the appraisal period.					
3.	My performance is measured using measurable and realistic standards.					
4.	The appraisal system considers both quality and quantity of work.					
5.	Team performance is also considered during appraisal.					

8) SUPERVISOR SUPPORT AND INVOLVEMENT

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-disagree, SDA- strongly disagree

S.no	Statement	SA	A	N	DA	SDA
1.	My supervisor provides guidance to improve my performance.					
2.	My supervisor conducts appraisal discussions in a professional manner.					
3.	My supervisor sets clear expectations for performance.					
4.	I receive continuous support from my supervisor throughout the year.					
5.	My supervisor recognizes and appreciates good performance.					

9) EMPLOYEE TRAINING AND DEVELOPMENT

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	The appraisal system helps identify my training needs.					
2	Training programs are provided based on appraisal results.					
3	Performance appraisal helps in improving my skills.					
4.	Career growth opportunities are discussed during appraisal.					
5.	The organization invests in employee development.					

10) EMPLOYEE SATISFACTION AND PERCEPTION

State the level of agreement towards the following statements

SA -Strongly Agree, A- Agree, N- Neutral, DA-Disagree, SDA- Strongly Disagree

S.no	Statement	SA	A	N	DA	SDA
1.	I am satisfied with the current appraisal system.					
2.	The appraisal process motivates me to achieve higher targets.					
3.	I believe the appraisal system is necessary for organizational growth.					
4.	The appraisal system improves overall organizational performance.					
5.	The appraisal system builds trust between employees and management
